Dear Friend,

If you'd like to get an in-demand premade template pack, ready to sell...

Plus:

The exact starving niche to sell it to...

This is the most important thing you'll read today.

### First, Let's Go Back To The 18th Century In China

A little puzzle game called Tangram was born.

Also known as “seven boards of skill”.

Why?

There's 7 polygons (aka tans) you use to piece together a specific object, such as a Tiger.

The puzzle is getting them all to fit right.

Everybody loved it so much, it made it back on ships from China and ended up in England.

After that, it spread to Europe and beyond.

And nowadays?

Well... it's everywhere.

## Here's Why This Matters To You:

Tangram has been around since the 18th century.

It's more popular now than ever.

Let's take a look at the good ol' Amazon:

The image shows four Amazon product listings for tangram toys. Each listing includes a product image, a title, a price, a discount tag, a Prime benefit, and an age range.

Thousands of sales.

## Imagine If You Could Cut A Tiny Slice Out Of This Market

Let's take one of the (poor Tangram products... more on that later) and do the math.

4,034 reviews.

Those are purely reviews, not considering the countless other people who never left a review.

That's priced at \$9.19.

So, let's take  $4,034 \times \$9.19$ .

**That's \$37,072.46, Sitting On The Table Waiting For You To Make It**

Keep in mind, that's just one product.

The market is huge.

See anything wrong here?

Let me break it down:

- 1) They put a focus on the amount of tans over the actual designs.
- 2) None of these have many designs at all.
- 3) You have to buy it, then wait for shipping.

People don't care about the amount of tans they have.

They care about solving a complex puzzle.

The design is the actual puzzle.

Tans are just a means to solve the puzzle.

Further:

We live in 2021, people don't want to wait.

For Tangram, all you need are designs and tans.

Something you could literally deliver through PDF, for people at home to print out and cut out.

## Bringing The 18th Century To Now...

We saw there was a clear demand that wasn't being fed.

People want:

- 1) Tons of good Tangram designs.
- 2) The ability to play now.

That's exactly why we created:

## The Ultimate Tangram Pack

It's a collection of 5 different Tangram eBook's.

We didn't cheap out either.

These are incredibly well done.

Ranging anywhere from birds, to buildings.

[Insert a picture of the front page of all 5 designs]

Each contains 10 different designs.

That's a whopping 50 total designs.

In other words, a juicy steak.

## Here's The Best Part:

You get full commercial rights.

That means you can sell 'em like you made 'em to an insanely starving market.

Rather than spending time and money trying to hire a designer to get them made, you get access immediately within your Scribble account.

Imagine if you were to sell them for \$9 like the other product mentioned above.

If you could only sell 100 of them, that's \$900 bucks!

Plus:

There isn't any waiting!

They can buy them, and since it's in PDF form they can instantly print them out.

We even add the Tangram shapes within the PDF so all they have to do is print it out, and cut them out.

No waiting.

No poor quality designs.

And TONS of Tangram designs.

## Here's The Deal:

Our normal pricing for our ultimate Tangram template pack is \$197.

But today, we're going to take \$100 bucks off the price.

That means, you can keep one of these in your wallet:

So for \$97 bucks you can get 5 different Tangram eBooks, each having 10 different designs WITH full commercial rights to resell them.

The only catch?

We're pulling this offer when the clock below hit's zero...

## Why This Is A No-Brainer...

You're looking at spending at least \$1,000 if you were to go out, hire a designer, and try to create these Tangram eBooks.

Not including your time.

This way, you get instant access.

No waiting.

No hiring designers.

If you were to sell these for \$9, all you would have to do is sell 10 of these Tangram eBooks to make back your entire investment.

Now if you sold 20 of them at \$9, you'd double your investment.

Sounds like a pretty safe bet to me.

## Don't Just Take My Word For It

We're no new kid on the block.

Thousands have bought our templates before and reaped the benefits.

[Insert testimonials, video & text]

Right Now You Have Three Choices...

The first is to do nothing.

Absolutely nothing would change.

You'll have discovered a golden opportunity, and decided to not take it.

The second?

You discover a golden opportunity of an insanely starving audience, and decide you can make the product on your own.

So you waste time and money to hire a designer, get your own made, and end up spending much more than you could get it for today.

Now I might be biased, but that doesn't make much sense to me.

The third?

You realize the value here.

You click through, buy the Tangram template pack.

Start selling a juicy steak to an insanely starving market, and reap massive benefits.

And personally?

I think you understand an opportunity when you see it.

All you have to do to seize that opportunity?
